# SAP Litmos

SAP Litmos Training - Content Author

SAP Litmos Training - Content Author allows users to create dynamic and visually appealing SCORM 1.2 content within the LMS. This powerful feature is designed to support everyone from the novice content creator to the expert instructional designer to create engaging content in support of their organization's goals.
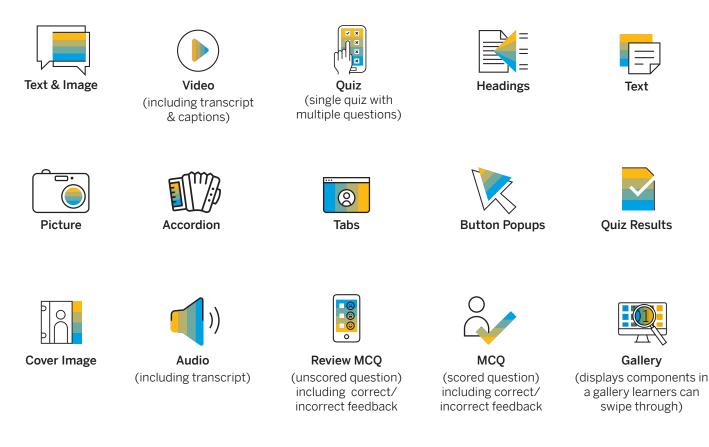

Feature Set

SAP Litmos Training - Content Author contains the following features:

- Courses and modules are created directly in SAP Litmos Training as normal

- The fully integrated Content Author creates modules directly from Create Module

- All courses use a standard neutral theme with highlight colors and/or logo directly from your Litmos Brand Theme

- Fonts, Colors, Logo and Theme can be changed per Module

- Simple Next/Back navigation

- Option to lock progress

- Accessible (508 and WCAG AA) for Admin users

- Courses and modules are created directly in SAP Litmos Training

- Produces accessible content by default

- Displays all functionality in logged in user's language (from SAP Litmos Training user profile)

- Choose which language to build course in[1]

- Create multiple pages (or 'Slides')

- Add, delete and reorder pages

[1]Will support content created in SAP Litmos Training-supported languages. Does not translate content. One language per course.

- Choose from a list of predefined page templates and components, e.g.:
